

## **Transportation for Illinois Coalition Statement on Governor's Approval of Critical IDOT Projects**

Today is an important day for transportation in Illinois. By signing into law the portions of House Bill 4166 that provide for transportation infrastructure spending, Gov. Rauner and lawmakers have provided certainty that the vital construction season will move forward as planned and many workers will go to work fixing our roads and bridges around the state. The Transportation for Illinois Coalition advocated strongly that this program move forward because of how important it is to our economy, and we are encouraged by the governor's decision.

There is still more to be done to provide much-needed investment in our transportation infrastructure. TFIC looks forward to working with the governor and lawmakers this summer on a long-term, meaningful plan for funding.
